

NATURE LESSON #1 A Paragraph: Talking to Nature

Greetings. Hope everyone is safe and sound in your homes. We share our planet with the plants and animals surrounding us. This is our natural habitat. The word Ecology is based on the Greek eco and logy or the study of our house. Extend yourself outdoors into Nature. Merge!

For the summer I have been taking walks with my dog Wiley in the backtrails behind my house in Carlotta, CA and in the old growth Redwood Parks close by.

I have been talking to the pants, trees, the dragonflies, and the spiders and they have been talking back!

What is nature saying to you? Take out a journal/notebook and a pencil. Look at a tree. What does it say to you. Look at a flower. What does it say to you. Choose 3-5 objects in your yard or your forest. Write a paragraph about your observations and your conversation.
